PROFESSIONAL SUMMARY

I have spent the past several years working in education, school operations, and learning design. While my career started in neuroscience research and behavioral support, I gradually became more involved in improving the systems behind the learning experience: student retention, parent communication, workflow automation, progress tracking, curriculum design, and operational improvement.

At KANA English School, I have led projects ranging from LINE-based workflow automation and student progress tracking systems to retention initiatives and financial literacy curriculum design. My work focuses on making learning experiences more effective while reducing operational friction for teachers, students, and families.

My background combines psychology, education, research, and multilingual communication. Having lived in Turkey, the United States, Italy, and Japan, I am comfortable working across cultures and navigating different perspectives and working styles.

Seeking opportunities in Learning Operations, Learning Experience Design, Enablement, or Program Management where I can combine learning design, operational improvement, and stakeholder communication.

CORE COMPETENCIES

Learning Operations

- Workflow design and improvement
- Learning data collection systems
- Process automation
- Learning technology implementation
- Operational documentation
- Stakeholder communication

Learning Design

- Curriculum design
- Learning experience design
- Facilitation design
- Assessment design
- ICAP framework
- Youth and adult learning principles

Service & Experience Improvement

- User interviews
- Journey mapping
- Service blueprinting
- Customer communication
- Retention initiatives
- Continuous improvement

Tools:

Figma, FigJam, Notion, Make.com, Supabase, Python (Basic), CRM Systems, Learning Management Systems (LMS).

Languages:

Japanese (N1), English (Native), Turkish (Native), Italian (Fluent), Russian (Basic).

PROFESSIONAL EXPERIENCE

School Manager & Operations Lead — KANA English School | Ichikawa, Chiba

March 2022 – Present

Responsible for the end-to-end learning experience, student retention, parent communication, and operational improvement initiatives across the school.

Retention & Parent Experience

- Interviewed parents to better understand why students were leaving the school and found that many families struggled to clearly see their child's progress and the value they were receiving. Introduced new communication touchpoints, including lesson streaming and structured parent-teacher interactions, helping improve contract renewals.
- Led a marketing initiative that added 25 new students in 3 months and contributed to continued enrollment growth.
- Mapped end-to-end journeys for more than 50 families and identified communication bottlenecks between parents and teachers. Redesigned inquiry and scheduling processes, reducing response times by approximately 30%.

Learning Operations & Automation

- Replaced a 9-step manual email workflow that handled more than 35 absence and makeup requests per week with a LINE-based system built using LIFF, Make.com, and Google Workspace. Parent-facing requests could be completed in under a minute, with roughly 70% of families registering within the first two weeks.
- Designed a teacher logging tool that fits inside an 8-minute gap between classes. After three iterations, implemented a QR-code-driven workflow with real-time synchronization through Supabase, reaching 80% adoption within the first month.
- Led the transition from manual administrative processes to automated workflows using CRM and LMS tools, reducing administrative workload by approximately 10 hours per week and allowing staff to spend more time supporting students and families.
- Led improvements to the school's website and digital services based on user feedback, helping strengthen the parent experience and create additional enrollment opportunities.

Curriculum & Program Design

- Designed a financial literacy curriculum that combined simulations, structured decision-making activities, and real-world business concepts. Built the program around the ICAP framework and adapted facilitation strategies to fit Japanese middle school and high school classroom dynamics.

Service Recovery & Stakeholder Management

- Served as the primary point of contact for service issues and dissatisfied families. Used interviewing, active listening, and structured problem-solving approaches to resolve concerns and rebuild trust with at-risk accounts.

Native English Teacher (NET) & Sales — Amity Corporation | Japan

Feb 2020 – March 2022

- Taught English lessons to students ranging from infants to high schoolers.
- Responsible for student retention and selling supplemental seminars and materials to parents to meet branch sales targets.
- Managed parent communication and student progress tracking.

Data Entry Specialist — Equian (now Optum) | Boston, MA

Sep 2019 – Feb 2020

- Processed insurance claims and medical records for a healthcare payment integrity company.
- Maintained 99% accuracy in data verification while meeting strict daily volume quotas.
- Handled sensitive patient data in compliance with HIPAA regulations.

ABA Behavior Therapist — Autism Connections | Boston, MA, USA

January 2019 – September 2019

- Served as a home therapist for children with ASD in immigrant communities.
- Behavioral data collection and processing.

Behavioral Research Assistant — University of Vermont | Burlington, VT, USA

August 2014 – December 2018

- **Quantitative Data Analysis:** Conducted statistical analysis on behavioral datasets and neurological data (EEG sleep spindle studies) to identify cognitive decision-making patterns and explore early signs of ADHD and ASD.
- **User Observation & Protocol Compliance:** Managed clinical trial logistics and subject observation, ensuring 100% compliance with ethical research protocols.

EDUCATION

University of Vermont | Burlington, VT, USA Degree: Bachelor of Science (B.S.) in Psychology —
Focus: Neuroscience, Behavioral Analysis, Clinical/Field Research

United World College of the Adriatic | Trieste, Italy

CERTIFICATIONS

- Japanese Language Proficiency Test (JLPT): Level N1
- Google UX/UI Design Certificate
- UCSD Copywriting/Copyediting Certificate
